Hazardous Weather

Hazardous Weather

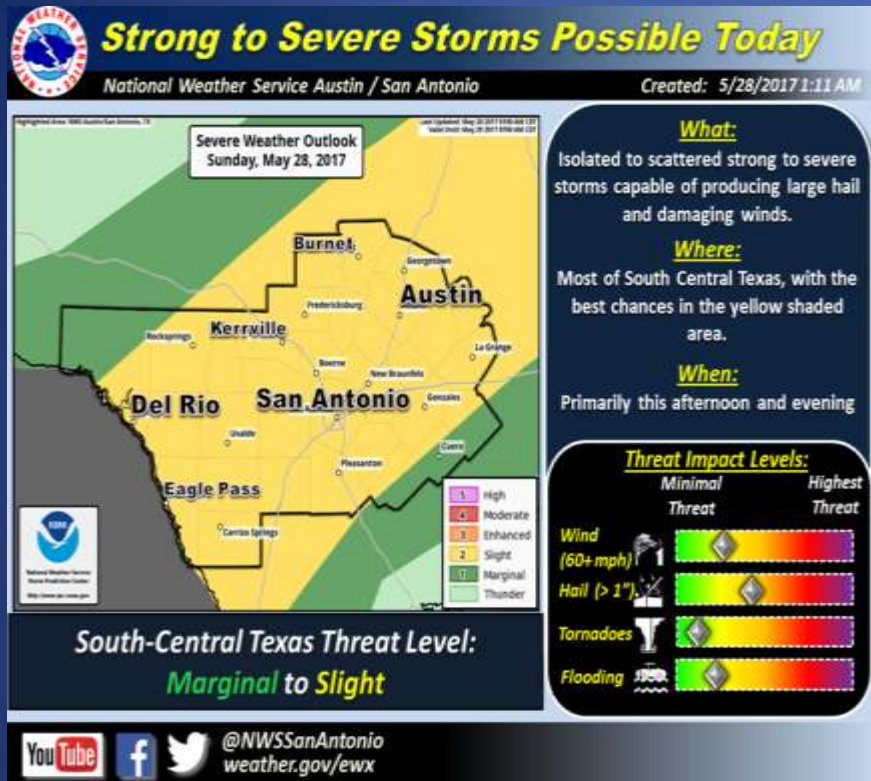

Thunderstorms are expected to develop this evening along a cold front and move to the southeast into the Brush Country. There is Slight Risk for some of these storms to become strong to severe with the main threats being large hail and damaging straight-line winds.

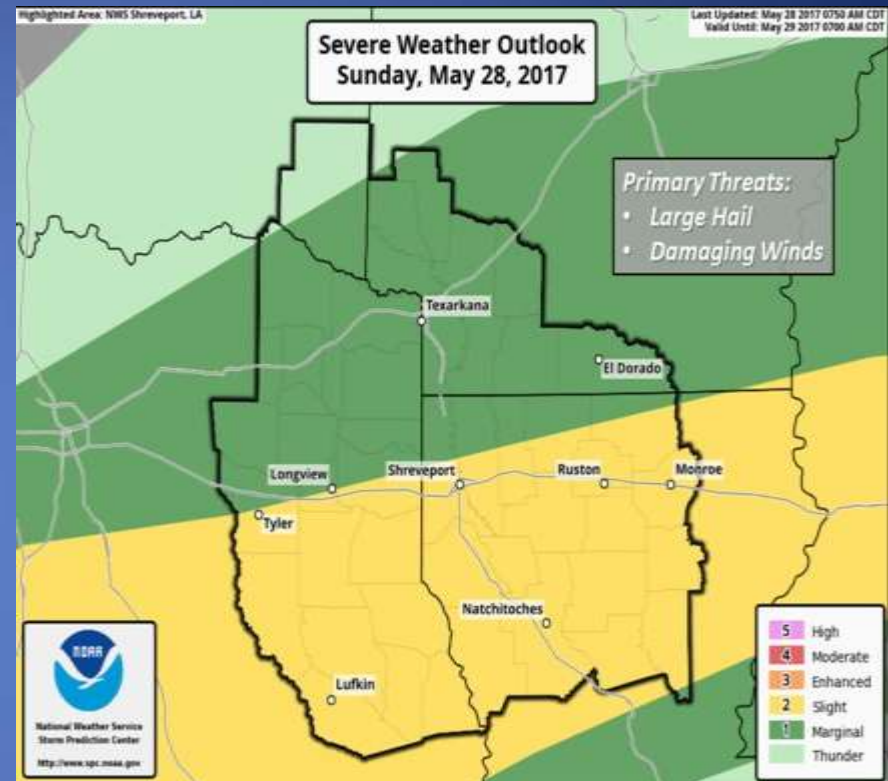

Strong to severe thunderstorms are possible this afternoon and evening across the region, with best chances roughly north of Interstate 10. Damaging winds, large hail, and locally heavy rainfall are the main threats.

Hazardous Weather

Strong to severe storms will be possible for most locations across South Central Texas this afternoon as a cold front moves in during the late afternoon and evening hours. Large hail and damaging winds will be in the main severe weather threats. Some locally heavy rainfall can also be expected.

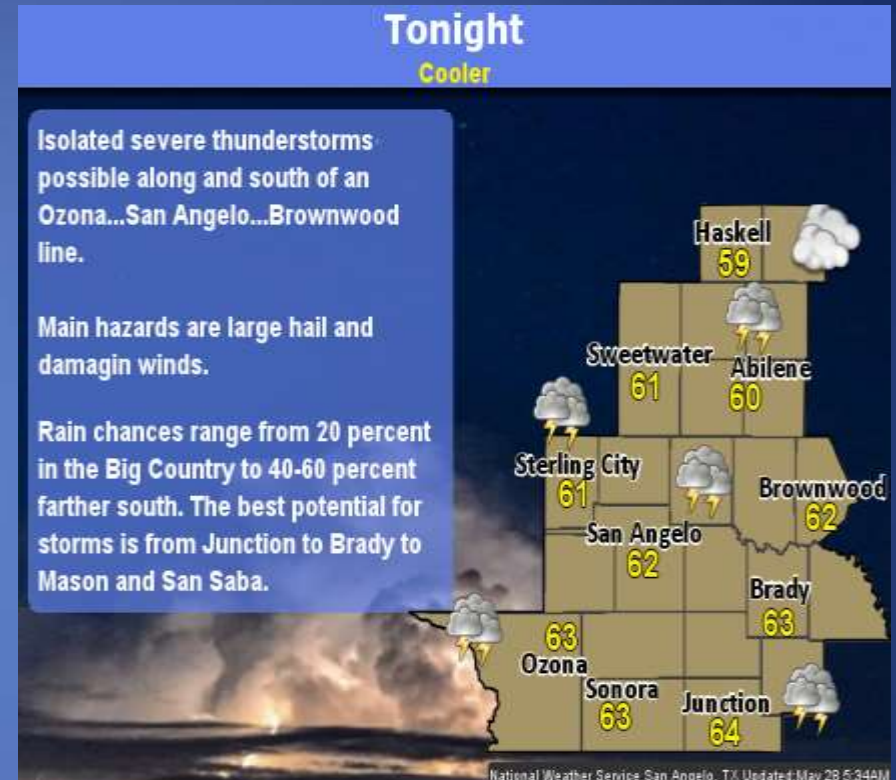

Showers and thunderstorms will be possible today, mainly south of I-20. Some of the storms could be severe with large hail and damaging winds.

Hazardous Weather

Some scattered storms are possible on Sunday along a stalling front in Central Texas. The front's location and the thunderstorm potential will depend highly on any thunderstorms that may occur Saturday night. A few storms could be strong or severe on Sunday afternoon or evening.

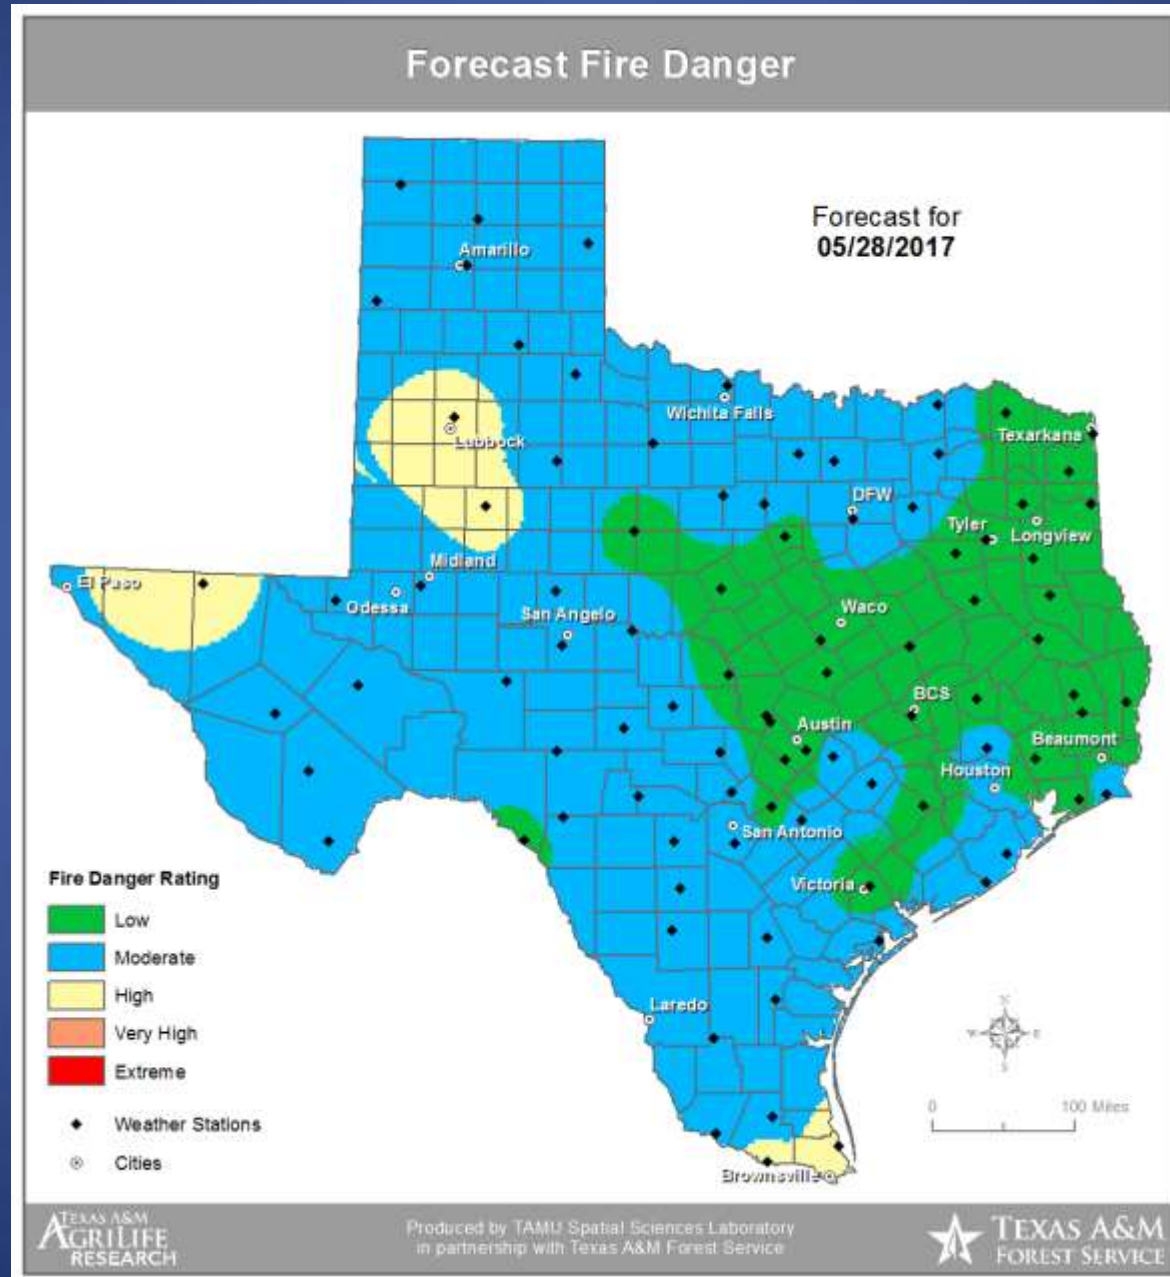

A cold front will bring north winds and slightly cooler conditions for West Central Texas tonight. A few isolated storms will also be possible, but most areas will remain dry.
